PROFIL

Graduate engineer with initial training in healthcare, I have worked in complex technical environments, particularly around cloud computing and data processing. There, I developed an understanding of information systems and their challenges regarding security and risk management. Admitted to the Master in Cybersecurity of Infrastructures and Information Systems at ESIEA, I now want to move into cybersecurity to develop my skills and progressively build my professional career in this field.

WORK EXPERIENCES

EEKEM - Data Engineer PDA at AMADEUS

CDI

Nice | July 2025 - today

- Worked with cloud platforms (AWS EMR, Databricks) to run, analyze, and test data notebooks
- Launched and monitored data processing jobs using Jenkins in a Big Data environment
- Conducted feasibility studies, checked technical requirements, and refined product improvements
- Participated in quality assurance and technical validation before production releases
- Analyzed business needs and wrote functional and technical specifications
- Created and maintained functional and technical documentation
- Coordinated across teams (DevOps, Product, and Data) in an international environment
- Led Agile ceremonies (daily standups, retrospectives, iteration reviews) as Scrum Master
- Wrote user stories, defined acceptance criteria, and tracked deliverables in Jira

ME3D Graft - Python developer

CDD

Pécs | February 2024 - March 2025

- Development of an automation application using Python (Tkinter, Pillow)
- Image analysis and 3D reconstruction
- Agile management (backlog, user stories, sprints)
- Functional testing and corrective maintenance

AP-HP at Garches - Engineering Study Project

Study project

Garches | September 2023 - January 2024

- Gathered requirements from radiologists/clinicians, wrote specifications
- Facilitated workshops, user training and support
- Prepared DICOM images data, AI development (segmentation with TensorFlow)

EQUANS - Cyber Risk Analyst

Internship

Courbevoie | September 2022 - January 2023

- Deployed cyber awareness campaigns (planning, materials, internal communication)
- Cross-business unit risk analyses (impact/probability matrices)
- Created Power BI dashboards to track security maturity indicators
- Automated Workflow (Power Automate)

STUDIES

ESIEA - Master in Cybersecurity

Ivry-sur-Seine | Starting September 2026

- Expertise in Cybersecurity and Information Systems Infrastructure

EPF - Engineering Degree

Cachan | Sept 2019 - July 2024

- General Engineering Degree – Specialization in Biomedical Engineering

LANGUAGES

- French (Native)
- English (Professional, B2+ TOEIC: 840)

SKILLS

Project Management

- Requirements gathering, specification writing, coordination, planning, Agile methods (SAFe), project tracking

Programmation et informatique

- Python, SQL, Scala, Spark
- Github, Git
- Azure, Databricks, AWS (EMR), Redshift
- Jenkins, Jobflow

Soft Skills

- Curious, Autonomous, Adaptable, Proactive, Team working

INTERESTS

Sport: Gym, running and calisthenics

Art: Drawing and pottery

Technology:

- 3D Modeling & Printing
- Exploring generative AI (ComfyUI, image processing)
